Dear applicant,

Thank you for your interest in our university. Hochschule Mannheim – Mannheim University of Applied Sciences offers a Bachelor of Science programme in Electrical Engineering, taught in English for the first year, combined with intensive German language courses.

In your third semester you either chose Electrical Engineering with a focus on Automation and Industrial Internet of Things or Electrical Engineering with a focus on Power Engineering and Renewable Energies. Then the language of instruction is German.

Your complete application must reach our office by 15 May 2020.

Proof of sufficient English language skills is one of the admission prerequisites (TOEFL - paper-based minimum 550, computer-based minimum 213, 80 (IBT); or IELTS minimum 6.0). Students who have studied for at least one year with English as the medium of instruction need to include proof of this in their application and do not need any other certification.

In addition we recommend German level B1 for a good start in Germany.

Due to the multitude of applications we receive each year, and as the number of students to be admitted is restricted, applicants should have very good school-leaving or university graduation grades.

All our students have to pay administration fees of currently €170.40 per semester. Non-EU students additionally need to pay tuition fees of €1,500 per semester. As a requirement to obtaining a visa, you need at least €6,000 deposited in your bank account or a sponsor who can guarantee to finance your studies.

If you are interested in the above course for winter semester 2020/21, starting beginning of September 2020, please download the application form from our website. As you can find all the necessary information on the internet, neither brochures nor application forms will be sent by post.

Please note that due to university admission regulations we cannot consider an application unless it is complete, i.e. a completed and signed application form, one photograph, a curriculum vitae / resume, a
short motivational letter (content: Why do you want to study Electrical Engineering? What are your specific talents/interests? What is your motivation for studying in Germany? Why Mannheim? Which competences and knowledge do you want to gain by studying with us?), certified copies of original certification of your academic qualifications, at least one reference letter and proof of English competence.

We are unable to accept predicted grades for admission.

Please only send notarised copies and no originals. There will be no return of application documents.

We only accept applications by post, best by courier service, as we are unable to accept applications by e-mail. Our application form can be found on https://www.ete.hs-mannheim.de/bachelor/apply.html

Applicants from Bulgaria may apply with the certificate of winter semester of the 12th class.

International students need to be at least 18 years old when enrolling with us beginning of September.

Check out detailed course information for Electrical Engineering with a focus on Automation and Industrial Internet of Things on https://www.ete.hs-mannheim.de/bachelor/electricalengineering-automation/description.html
