FAQ about the Corona Virus

What do I do if a contact of mine has tested positive?
- 14 days domestic quarantine
- Create a list of contacts within the last 14 days (name, telephone, e-mail, if possible registration address), this list can be requested from the public health department if necessary
- As employee: Information to superiors, clarification of further procedure
- If no symptoms are noticeable in the household during this time and the situation has been discussed with the university: come back to the university
- If symptoms occur in the household during this time: Immediately call your family doctor, inform the health authorities, inform the university

What do I do if I meet a person who shows flu-like symptoms (e.g. fever, cough, infection-related shortness of breath)?
- Answer the key questions of the Robert Koch Institute:
  o Has the person been in one of the risk areas within the last 14 days?
  o Has the person had contact with a coronavirus patient within the last 14 days?
- If one of the two questions is yes, ask the person concerned to obtain a medical assessment of the situation. Ask employees of the university to contact the personnel department immediately by telephone to clarify the further procedure.
- According to the current status, the ministry of science recommends that this person should stay away from the university for 14 days.

What do I do if a student in my course shows symptoms?
- You must NOT ask the person to leave the course.
- Consider possibly canceling the course.
- Ask the person to get a medical assessment of the situation, if necessary (see previous question).
